17 April 1958

Mr. Norman G. Harper
Acting Chief, Design & Construction Division
General Services Administration
Public Buildings Service
Washington 25, D. C.

Dear Mr. Harper:

On April 1 we wrote you concerning the matter of surveying and fencing our property at Langley and advised you of our intention to have the survey work done by National Capital Parks.

It was our belief that it would be simpler for us to deal directly with National Capital Parks but we now find that for budgetary and accounting reasons we can save a good deal of paperwork by asking you to arrange to have this work done.

We are enclosing original letter dated April 10, 1958 from National Capital Parks confirming the estimated cost of \$2,500 for the purpose. Please take the necessary steps to enable the National Capital Parks to start the survey. The cost will be chargeable to our construction funds and I understand that you have a sufficient balance of funds on hand to cover this project.

We are advising the National Capital Parks that the order for the work will come from your office. A copy of this letter is also enclosed.

Sincerely,

D
